

Install the runtime

The ASP.NET Core Runtime allows you to run apps that were made with .NET that didn't provide the runtime. The following commands install the ASP.NET Core Runtime, which is the most compatible runtime for .NET. In your terminal, run the following commands:

Bash

 Copy

```
sudo apt-get update; \  
  sudo apt-get install -y apt-transport-https && \  
  sudo apt-get update && \  
  sudo apt-get install -y aspnetcore-runtime-6.0
```

Important

If you receive an error message similar to **Unable to locate package aspnetcore-runtime-6.0**, see the [APT troubleshooting](#) section.

As an alternative to the ASP.NET Core Runtime, you can install the .NET Runtime, which doesn't include ASP.NET Core support: replace `aspnetcore-runtime-6.0` in the previous command with `dotnet-runtime-6.0`:

Bash

 Copy

```
sudo apt-get install -y dotnet-runtime-6.0
```
